

udomi – Fuel Cell News December 2006

Fuel cell systems and components

**Automatic Battery Charger (ABC) –
Now with enhanced feature set**

The new Voller Energy ABC unit has been enhanced with new features that provide additional user benefits.

- USB charging socket. Allows to charge USB devices such as IPOD
- Built in frost sensor protects ABC unit from freezing
- Remote communication software VTERM with new features
 - Auto Charge cut in voltage level is now user adjustable (10.5 to 13.8V)
 - Graphical display of logging data
- Local Inhibit switch for remote control of the ABC unit (important in hybrid systems)
