

**udomi – Fuel Cell News February 2009**

**OUTDOOR-CABINET-GFP for EFOY-PRO-Series**

The OUTDOOR-CABINET is prepared for installation of EFOY-PRO-Series fuel cells as well as accessories such as battery, Methanol fuel cartridge, GSM-2 remote monitoring and optional solar charge controller when combined with photovoltaic. The robust and weather proven cabinet can be mounted on walls or masts.

Specifications:

- Dimensions (HxWxD): 845x653x300mm
- Fuel Cells: EFOY-PRO-600/1200/1600
- Fuel cartridge: M5/M10 or M28
- Battery sizes: 1 x 60Ah (12V) or 2 x 40Ah (24V)
- Remote Monitoring: GSM-2 Modem with FS1 fuel cartridge low sensor
- Solar charge controller: SS20L-12/24 or SS-MPPT-15L with low voltage disconnect
- Solar module: KC85-12 (85 Watt Peak) polycrystalline

If you provide us with informations on your remote power need (load, voltage, autonomy) we will send you a system solution based on EFOY-PRO, free of charge. Please email your informations to [sales@udomi.de](mailto:sales@udomi.de)

OUTDOOR-CABINET-GFP with Photovoltaic

OUTDOOR CABINET GFP

**H2GO - Hybrid Hydrogen RC car**

This battery-free model scale RC car is a real-working version of laboratory vehicles running on renewable and zero emissions hydrogen fuel. This refuelable RC vehicle runs on energy from the sun and water, and combines fuel cells for cruise power, and fast-charge super-capacitors for speed.
