

**udomi – Newsletter February 2010**

**EFOY-PRO Series**

Streamline product offering – adjust pricing

With the recent introduction of EFOY-PRO-2200 the EFOY-PRO-1200 and EFOY-PRO-1600-Longlife will be discontinued (March 1<sup>st</sup> 2010). This will streamline the product offering. The 3 devices EFOY-PRO-600/1600 and 2200 cover the bandwidth from 25 Watt to 90 Watt.

Model	Power in Watt
EFOY-PRO-600-SET	25 Watt max 600Wh/day
EFOY-PRO-1600-SET	65 Watt max 1560Wh/day
EFOY-PRO-2200-SET	90 Watt max 2160Wh/day

Due to increased cost for raw material, prices for EFOY-PRO series devices will be increased slightly starting March 1<sup>st</sup> 2010 (app. 5%).

**GSM-2 and GSM-GPS-2 now support monitoring of Solar Charge Controller SS-MPPT-15L**

With the latest firmware update the GSM-2 and GSM-GPS-2 remote monitoring solution supports the SS-MPPT-15L (Morningstar solar charge controller with RS232 interface). To connect GSM-2/GSM-GPS-2 with the SS-MPPT-15L the optional Meterbus adapter is required. Alarms can be configured for low voltage, load disconnect and theft of solar modules.
