

## udomi – Fuel Cell News February 2005

### Fuel Cell Systems and Components

#### NEW: SFC A50M with communication interface Industrial version of the SFC A50

The SFC A50 M is a superset of the SFC A50 providing extra features for industrial applications. Control and Monitoring interface with live access to internal parameters such as stack voltage, stack current, temperature etc.

Please contact us for details on pricing and technical questions.

SFC A50 M with 10Liter Methanol Fuel Cartridge

#### NEW: Metal Hydride Storage Tanks with storage capacity ranging from 20sl to 500sl of hydrogen for example:

HL-300 with 300sl hydrogen storage capacity and a flow rate of app. 2-3sl/min @ 25°C (5sl/min @ 20°C water bath) for EUR 500,- plus freight.

#### Price lowered for CuteFC, CozyFC und CoolFC-Stacks (up to 40%)

CuteFC-1 (Single Cell 1 Watt @ 0,6V)

now EUR 235,- (old price EUR 400,-)

CozyFC-4 (4-cells, 13 Watt @ 2,4V)

now EUR 900,- (old price EUR 980,-)

CoolFC-10 (10-cells, 100 Watt @ 6,0V)

now EUR 2.450,- (old price EUR 2.900,-)

Optimum power ratings achieved at H<sub>2</sub>/O<sub>2</sub> operation with 100% humidified gases.

Note: These stacks are also available without MEA and can be disassembled.

CozyFC Serie

### Fuel Cell Models and Accessories

#### Product of the month

Solar-Hydrogen-System ELFC with the following components :

- PEM-Electrolyzer (3 Watt)
- PEM-Fuel Cell (Single cell, app. 1 Watt@0,5V) for Hydrogen/Air operation
- Hydrogen storage buffer

Automatic control of electrolyzer via pressure switch.

**Now EUR 497,25 (15% discount) for limited time only!**
