Fuel Cell Systems and Components

LG2212/24

Fuel cell powered battery charger

The LG2212/24 is a compact size battery charger with a nominal output power of 15 Watt. It is designed to charge lead acid batteries in remote applications such as measuring drinking water quality in lakes or reservoirs. The LG2212/24 emits only water and warm air and can be integrated with solar battery systems to increase the availability of the system. It is available both for 12V and 24V battery systems.

Part#: LG2212T1 (12V), LG2224T1 (24V)
Price: EUR 2300,-

LG2212 (12V Version)

SFC A50 and SFC A50 OUTDOOR with GSM Alarm Modem GSM-1

The GSM-1 Alarm Modem provides control and monitoring of the SFC A50 and SFC A50 OUTDOOR at remote installations.

GSM-1 offers 2 basic functions:

- Sends SMS, email or fax when Methanol Cartridge needs to be replaced or if a failure occurs
- Provides remote access to the communication interface of the SFC A50 and SFC A50 OUTDOOR to get information on the system status and information on parameters such as battery voltage, operating hours, temperature, energy output etc. This allows the service person to verify the system status online and fix problems from remote.

Alarm Modem GSM-1

SFC A50/ SFC A50 OUTDOOR

Part#: GSM-1
Price: EUR 575,-
