EFOY-PRO-Series – The fuel cell system for industrial applications

EFOY-PRO-Series has been developed for reliable operation in industrial applications such as off grid power in remote locations. The EFOY-PRO-Series has 3 family members EFOY-PRO-600/1200 and 1600 and will replace the EFOY-Industry devices.

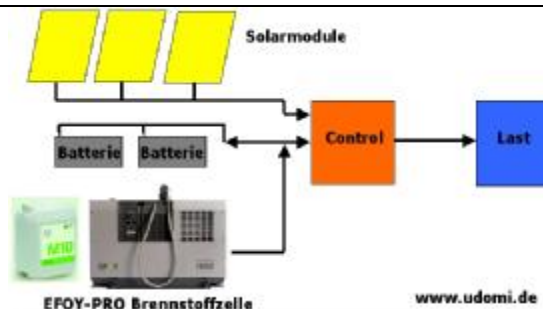

Below a summary of the most important new features of EFOY-PRO-Series:

- Robust metal housing
- 12/24V (automatic detection)
- Low fuel consumption (0.9l Methanol/kWh)
- Can be operated with M5/M10 and M28 Methanol cartridges
- Integrated fuel storage buffer tank allows extended fuel hose length and installation of Methanol cartridge and EFOY-PRO on different height levels
- Extended ambient temperature range -20°C to +45°C
- EFOY-PRO-1600 available in LONGLIFE version with 5.000h warranty.

EFOY-PRO

EFOY-PRO – PV Hybride System

BIO-ENERGY-KIT

This kit demonstrates the latest in fuel cell technology using ethanol as its fuel source. This fuel cell kit directly converts ethanol (alcohol) to electricity silently and without any combustion. The device runs non-stop for 8-12 hours using just a view milliliters of fuel.

Bio-Energy-Kit

H-RACER-SET 2.0 - THE NEXT GENERATION
Clean Energy Science Education kit (available starting mid of November)

New functions compared to H-Racer-SET (first generation):

- IR control (forward, backwards)
- Flexible Steering axis
- glowing lights
- faster speed
- longer runtimes
